

## Intern

Independent Security Evaluators (ISE) is currently seeking motivated and hard working individuals with a background in computer security to join our technical staff in the capacity of an intern, assisting with various functions including: network and system administration, coding and application support, attack simulation, source code analysis, designing new systems, cryptographic algorithm design and review, and security evaluations.

### **Education and Experience Requirements:**

- Must hold or currently be pursuing a computer science or related degree.
- Programming experience.
- System and network configuration and administration experience.
- Strong analytic skills, with excellent attention to detail.
- Ability to multi-task and work efficiently in a dynamic, demanding environment.
- Excellent written and verbal communication skills.
- Previous experience with information security a plus.

This position is based at ISE's main office located in the Mount Washington area of Baltimore.

*ISE is a leading information security consulting firm founded by Dr. Avi Rubin, Professor of Computer Science and Technical Director of the Information Security Institute at the Johns Hopkins University. ISE clients include multinational banks, Fortune 50 corporations, venture capitalists, healthcare providers, e-commerce vendors, and software security companies. ISE is recognized nationally for high profile security evaluations performed by team members including:*

- *Reverse engineering the proprietary block cipher on the Texas Instrument RFID transponder chip.*
- *Revealing concerns with the AACSS specification on the content protection systems now deployed in BluRay and HD-DVD players.*
- *Identifying grave security problems with the source code in Diebold's e-voting machines.*
- *Uncovering security vulnerabilities in the iPhone and Android-based devices.*
- *Demonstrating attacks on popular online-based games Second Life and Age of Conan.*

**To apply, please send resume and cover letter via e-mail to:**

Stephen Bono, Senior Security Analyst
