

Software Developer

About ISE:

Independent Security Evaluators (ISE) is a genuinely independent consulting firm dedicated to providing unbiased and scientifically motivated approaches for improving security. ISE clients include multinational banks, Fortune 50 corporations, venture capitalists, healthcare providers, e-commerce vendors, and software security companies. ISE is recognized nationally for high profile security evaluations performed by team members including:

- Reverse engineering the proprietary block cipher on the Texas Instrument RFID transponder chip.
- Revealing concerns with the AAC3 specification on the content protection systems now deployed in BluRay and HD-DVD players.
- Identifying grave security problems with the source code in Diebold's e-voting machines.
- Uncovering security vulnerabilities in the iPhone and Android-based devices.
- Demonstrating attacks on popular online-based games Second Life and Age of Conan.

Independent Security Evaluators (ISE) is currently seeking full-time information security professionals with a background in software development to fill entry and mid-level positions at our secure-software development and consulting firm. Duties include secure software design, implementation and deployment, source code and design analysis, and product evaluation.

Education and Experience Minimum Requirements:

- BS in computer science
- Strong C, C++ programming experience
- Development for mobile platforms, iOS, Android, Windows CE
- In-depth understanding of operating system internals
- Knowledge of computer security fundamentals
- Strong analytic skills, with excellent attention to detail
- Capability to multi-task and work efficiently in a dynamic, demanding environment
- Excellent written and verbal communication skills

Compensation Package:

- Competitive salary
- Annual performance bonus
- Generous medical, dental and retirement benefits
- Paid vacation
